Stockbridge, Mass., March 20.—The identity of the woman who was the "chic" model in the triple murder case was revealed today by the Boston Herald. The woman, who was known to the police as "Lucy," was identified as Miss Vernon, a well-known model and actress.

Miss Vernon was the "chic" model in the triple murder case, which took place in the Roman Garden in London. She was the only woman who was seen in the garden at the time of the murders.

Little Damage to Cities

Enemy Air Attacks Called Fantastic

(Editor's Note: Plans issued with attack strike were great. It is a well known fact that the enemy's attack on the cities of Spain is a fantastic one. The enemy's attack on the cities of Spain is a fantastic one. The enemy's attack on the cities of Spain is a fantastic one.)

By JOHN LLOYD

Madrid, March 30 (AP)—The theory—often advanced as the dread certainty of the future—that great cities such as Paris or London or, more recently, New York could be razed and their civil populations slaughtered by the sudden sweep of an enemy air force was considered fantastic today on the basis of military aviation's actual performance in the Spanish civil war.

This opinion was advanced by government spokesmen here, and the latest air equipment under the most advanced technical conditions in the nation were used in the Spanish civil war. The enemy's attack on the cities of Spain is a fantastic one. The enemy's attack on the cities of Spain is a fantastic one. The enemy's attack on the cities of Spain is a fantastic one.

Cuddled in a Huddle

No sooner did Jackie Coogan arrive in Los Angeles after a ten-week stay in New York city than he was greeted by his fiancée, the old, so cute Betty Grable, of stage and screen. It was a warm welcome, to say the least. Friends, interpreting for the temporarily inarticulate pair, explained they would marry in December.

Fever Kills Germs

105-Degree Bake Arthritis Cure

New York, March 30 (INS)—Definite relief from the wracking pains of arthritis and neuritis has been obtained for many patients treated in "fever chambers," it was reported today at the first international conference on fever therapy.

Good results in fighting a "fever disease" of the heart with artificial temperature elevation was also announced. Treatment of only one particular type of infection of the joints—acute nonsuppurative infectious arthritis—was reported by Drs. R. B. R. and M. W. H. of the University of Western Ontario, London, Ontario.

Dr. B. R. B. of the University of Western Ontario, London, Ontario, reported that he had treated 100 cases of acute nonsuppurative infectious arthritis with fever therapy. The results were very good. The patients were cured of their pain and their joints were restored to normal.

NAZIS STRIKE NEW BLOW AT CATHOLICS

By PIERRE J. HUSS
International News Service
Staff Correspondent

Berlin, March 29.—Analysis here in the Nazi campaign to seize the power and prestige of the Catholic Church in Germany was struck today when officers were issued the first of a long series of orders for the seizure of Catholic schools in the Reich capital.

Under a mysterious decree, officials of the institutions were ordered not only to release students but to send them to the nearest Catholic school in the Reich capital.

The institutions ordered to be closed are the Jesuit "Hochschule" of the Catholic Ministry of Education, long one of the best known Catholic schools in Germany, and the German Catholic school at Schöneberg.

By banning 100 Catholic students and transferring pupils of higher grade to the Nazi government, the officers will succeed in striking the Catholic Church in the Reich capital.

A similar decree previously issued after political elections throughout the country.

Among the new orders, which came from the Reich Ministry of Education, was one for the Catholic school at Schöneberg, which was ordered to be closed.

The school, which was founded by the Jesuits, was one of the best known Catholic schools in Germany, and the German Catholic school at Schöneberg.

Around the World in 11 Years

The Boston Evening American is a year's journey through the tenth chapter of "Around the World in Eleven Years," the amazing best-seller book by the famous Abbe children, Patience, Richard and John Abbe, who have collaborated in writing one of the most remarkable of travel stories—their experiences (they are still children—and impressions of life in France, Austria, Germany, Russia, England and the United States. The little narrative was born in the face of American parents, James E. and Polly Platt Abbe. The story will continue daily in the American Advertiser.

By PATIENCE, RICHARD and JOHN ABBE
CHAPTER X

One day we went to the Park of Culture and met with Mamma and a girl who was Yiddish. A Yiddish person is Jewish.

My mother, father and grandma and uncle and brother were all killed by the Nazis and she was four months old and they took her to the church but some parents saved her.

She said to us, "Wouldn't you like to go to the United States?"

Mamma and she was a GPU. We took her to the park and she was very happy.

The boy who never comb his hair and never cut his fingernails and he was dirty and tough. And a policeman and four GPs were in the park and they were going to shoot him because he was not good.

I don't know why they didn't shoot him. It was only a poor little fellow.

One day we were walking across the Red Square, that's the place they have all the parades and where Lenin is.

A little boy was sitting on the ground and he had some good things and we had some apples and we gave him some and he wouldn't take them.

So then Mamma said, "If you keep smiling at him maybe he will smile and maybe he will love you." His poor little bit of mother.

So he did tell them to us four GPs and we gave them back to him and he took an apple and he went away and kept looking back and he kept looking and we smiled and he smiled and then we couldn't see him any more.

Then we saw a poor woman screaming in a truck and two GPs were taking her to jail and she was crying and she was sad.

Then we saw a man fighting with a policeman and the policeman took him to jail in a cage. The man was drinking vodka. Vodka is some kind of alcohol.

Then Johnny got his hand smacked at in those stupid Williams' cars and he took him to the hospital.

And there were a lot of people there and they were looking at us and they were talking to us and they were very nice.

Then we saw a man fighting with a policeman and the policeman took him to jail in a cage. The man was drinking vodka. Vodka is some kind of alcohol.

Then Johnny got his hand smacked at in those stupid Williams' cars and he took him to the hospital.

And there were a lot of people there and they were looking at us and they were talking to us and they were very nice.

Then we saw a man fighting with a policeman and the policeman took him to jail in a cage. The man was drinking vodka. Vodka is some kind of alcohol.

Then Johnny got his hand smacked at in those stupid Williams' cars and he took him to the hospital.

And there were a lot of people there and they were looking at us and they were talking to us and they were very nice.

"This is the way that I, Richard, and Johnny, said 'Heil Hitler' to the teacher when in public school at Berlin. I, Richard, am in the middle of the second row."

children's theaters. We saw one where Einstein was a big old man and China was a little lamb. Then we saw one where a Communist girl was saved by an American soldier and Stalin gave them a red bottom.

In the last Mamma said to come to an electric line. Then we took Mamma to a sleep with us and the hotel wanted to put her out but we kept her.

She said I have my plate to sleep, so we kept her. The lady on our floor was very angry because we caused trouble in our room.

The man next door to us had a violin and his hair was long and white. His Mamma said he played the violin very well. He was old and said, "Why do you fight your mother?"

He played his violin downstairs and a lot of girls came to listen to him and after he was through he was all wet on the face and almost blind.

His Mamma said, "He's almost crying because he loves his mother and is an old Bolshevik and Stalin is going to help him, but he's hungry and sad."

Then we all danced with the GPs and they had a phonograph. It was a beautiful phonograph and Mamma said the GPs would let us hear some records.

We went to live in the country to John. We lived with Vera, Mary, Anna and Olga. They were all very nice. They were all very nice. They were all very nice.

They conducted play with us because we were foreigners and Stalin would let us take to be foreigners.

We go swimming

Our home was called a dacha. Jackie Landa lived in an another dacha. Nadya (shepherdess) lived in another dacha. Nadya's mother would not let her go swimming every day because she didn't want to get wet.

We went to go swimming every day. Hanna and Mary were with us in the first class. We had a swim with the girls and the boys and we were all very happy.

One day we bought 100 eggs and they were all very nice. They were all very nice. They were all very nice.

Then we saw a man fighting with a policeman and the policeman took him to jail in a cage. The man was drinking vodka. Vodka is some kind of alcohol.

Then Johnny got his hand smacked at in those stupid Williams' cars and he took him to the hospital.

And there were a lot of people there and they were looking at us and they were talking to us and they were very nice.

Then we saw a man fighting with a policeman and the policeman took him to jail in a cage. The man was drinking vodka. Vodka is some kind of alcohol.

APE BATTLES WITH KEEPER

Chicago, March 29 (UPI).—Before the horrified gaze of 120 school children, Big Mike, a huge chimpanzee, went berserk at the Brookfield zoo and viciously attacked a keeper, Arthur Aiken.

Both of Aiken's arms were mangled and he suffered from shock as a result of being pummeled against bars of the ape cell. The animal used both its powerful arms and its teeth in the attack.

The children, together with a number of adults, were watching the animal in the ape's monkey house when Aiken, carrying a basket of vegetables, walked along a narrow passage in front of Big Mike's cage.

The ape reached through the cage bars and seized the keeper in a vicious grip. Aiken began screaming for help as the 200-pound animal maulled him. The children fled screaming from the building.

Altogether, another keeper, heard Aiken's shouts and came on the run with a heavy club. By the time he arrived, Mike's mate, Mizi, had joined in attacking the keeper against the bars and tearing at him.

Paratt managed to beat the two apes until they released Aiken. He was taken to a hospital where his condition was reported serious.

Boys Blamed for Prank

Boy pranksters were blamed by Malden police today for placing bodies of nine dead dogs in an isolated section of Forestside Cemetery, Malden.

Body in Hanover Pond

Hanover, March 30 (AP).—The body of a man tentatively identified as Thomas H. Curtis, 75, of Hanover, was taken today from a pond behind the Clapp Rubber Company plant.

Journalist Collins Dies

Lawrenceville, Ga., March 30 (AP).—Robert Moore Collins, 68, for many years correspondent for the Associated Press in Europe and the Far East, died today after a long illness.

Cambridge Youth Held After Long Newton Chase

Newton police today arrested an 18-year-old Cambridge boy after a long chase of two miles in the Newton Highlands.

One of the fighting men was young around 18 to the third class of the Cambridge, and was charged with disturbing the peace of the city.

The other was a woman, 24, of Cambridge street, who was charged with disturbing the peace of the city.

In the case of the Cambridge boy, the police said he was charged with disturbing the peace of the city.

The Newton officers held the car that took the Cambridge boy to the station. When they returned they found that the Cambridge boy was on the front and rear of the station.

The Cambridge boy was charged with disturbing the peace of the city.

Staring Dogs

Then we were walking along an office street and the dogs were all staring and staring and suddenly a dog came running very fast and it was a small dog and it was very fast.

Then we saw a man fighting with a policeman and the policeman took him to jail in a cage. The man was drinking vodka. Vodka is some kind of alcohol.

Then Johnny got his hand smacked at in those stupid Williams' cars and he took him to the hospital.

And there were a lot of people there and they were looking at us and they were talking to us and they were very nice.

Janet Gaynor says: "Leading artists of the screen prefer Luckies"

"I live at the beach most of the year and there is hardly a weekend that a number of friends don't drop in. Naturally, I keep several brands of cigarettes on hand for guests, but the Luckies are always the first to disappear. I suppose it's just natural that Luckies would be the favorite brand because most of my friends in pictures have discovered that the long hours of rehearsing and shooting at the studio place a severe tax on the throat. Leading artists of the screen prefer Luckies because they are a light smoke that sympathizes with tender throats."

Janet Gaynor
FEMININE STAR OF DAVID O. SELZNICK'S
TECHNICOLOR PRODUCTION OF "A STAR IS BORN"

THE FINEST TOBACCOS—
"THE CREAM OF THE CROP"

An independent survey was made recently among professional men and women—lawyers, doctors, lecturers, scientists, etc. Of those who said they smoke cigarettes, more than 87% stated they personally prefer a light smoke.

Miss Gaynor verifies the wisdom of this preference, and so do other leading artists of the radio, stage, screen and opera. Their voices are their fortunes. That's why so many of them smoke Luckies. You, too, can have the throat protection of Luckies—a light smoke, free of certain harsh irritants removed by the exclusive process "It's Toasted". Luckies are gentle on the throat.

A Light Smoke "It's Toasted"—Your Throat Protection

AGAINST IRRITATION—AGAINST COUGH

Boston Doctor Going to Arctic

Boston, March 30.—Dr. William W. Russell, of Boston, will accompany Lieutenant Commander Stanley H. MacMillan, naval aviator, on his Arctic expedition this summer as physician and surgeon.

Dr. Russell is now attached to the Massachusetts Memorial Hospital, Boston.

MacMillan will also be accompanied by 20 men, including Dr. Russell, and a ship named Captain Ben Pine's famous schooner, the Gertrude L. Thayer.

The expedition will leave for the Arctic in June.

HELPFUL ADVICE TO ACNE SUFFERERS

For acne pimples affecting the nose or surface layer of the skin, here is advice that will help improve your complexion.

Every night at bedtime, wash your face thoroughly with Resinol Soap and hot water. Do not rub. Follow with a dash of cold water.

Use the cream in the jar. Then apply Resinol Ointment to the affected skin and leave it on all night. Do this every night, and watch the improvement.

Local treatment is advised as a helpful aid in acne cases, and for more than 40 years the ingredients of Resinol have been found effective.

Resinol benefits by treating the irritated skin, while most acne treatments start. In this way it aids healing of such pimples and also tends to check their recurrence.

Buy Resinol Ointment and Soap in any drug store. For free sample, write Resinol, Dept. 15, Williams, Md.

FRED HOEY

Writes:

It is a fact that the world is a very different place today than it was a few years ago. The world is a more complex and more varied place. The world is a more interesting and more exciting place. The world is a more beautiful and more wonderful place. The world is a more peaceful and more harmonious place. The world is a more prosperous and more successful place. The world is a more happy and more content place. The world is a more free and more open place. The world is a more just and more fair place. The world is a more kind and more gentle place. The world is a more loving and more caring place. The world is a more understanding and more sympathetic place. The world is a more forgiving and more merciful place. The world is a more patient and more tolerant place. The world is a more humble and more modest place. The world is a more simple and more plain place. The world is a more honest and more truthful place. The world is a more brave and more courageous place. The world is a more strong and more powerful place. The world is a more wise and more intelligent place. The world is a more good and more virtuous place. The world is a more beautiful and more wonderful place. The world is a more peaceful and more harmonious place. The world is a more prosperous and more successful place. The world is a more happy and more content place. The world is a more free and more open place. The world is a more just and more fair place. The world is a more kind and more gentle place. The world is a more loving and more caring place. The world is a more understanding and more sympathetic place. The world is a more forgiving and more merciful place. The world is a more patient and more tolerant place. MERLE THORPE SAYS:

**Labor Out-thinking
BUSINESS IN MATTERS
Of Public Relations**

By MERLE THORPE

New York, March 30 (UPI)—Then and now, says the president of the Brotherhood of Locomotive Engineers, "businessmen" who have looked at labor as a mere cost to be kept down have been out-thought by labor in the matter of public relations.

FRANKLIN LEE MOTOR

March 29, 1937

Mr. Lee, I have
been very much interested in
your advertisement for the
Franklin Lee Motor.

I am writing you to tell you
that I have decided to purchase
one of your Franklin Lee Motors.

We will be glad to have you
send me the name of the dealer
who will sell me the motor.

I am sure you will be glad to
have me purchase one of your
Franklin Lee Motors.

Very truly yours,

May Cabern
President

SEC RULES

Trading BY SPECIALISTS Studied

By HUGH E. BRADSHAW

The SEC has apparently overcome the difficulty of governing dealings by floor specialists through an interpretation of an existing rule rather than by promulgating new regulations.

The staff points covered by the interpretation concern conduct in the handling of purchases and sales and in the execution of orders in the market.

There is a broad interpretation that specialists should not trade in securities to which they have access to information not available to the public.

In general, the staff of the SEC has been studying the problem of the specialist's role in the market. It has been found that the specialist's role is to provide liquidity in the market and to execute orders in the market.

Under the new interpretation, specialists are not to trade in securities to which they have access to information not available to the public.

Specialists are not to trade in securities to which they have access to information not available to the public.

Specialists are not to trade in securities to which they have access to information not available to the public.

Specialists are not to trade in securities to which they have access to information not available to the public.

STOCKS In Sharp RALLY STEEL, COPPER FEATURE

New York, March 30.—Steel and copper shares provided impetus for a mild and selective rally in the stock market today.

Trading interest was light, however, and volume was at a low level.

The rally was led by steel and copper shares, which were up 1 to 2 points each.

Other shares were mostly flat, with a few exceptions.

The rally was led by steel and copper shares, which were up 1 to 2 points each.

What We Are Giving Up in the Philippines

IN GIVING UP the Philippines, the United States is giving up what will in a few years probably be the greatest gold mining country in the world.

This is like giving up California WOULD HAVE BEEN in '49.

The American government was intelligent enough to keep California for the United States. The present American government is not being that intelligent about the Philippines.

We are deliberately letting go of a vastly rich territory.

And we are turning it loose into the maelstrom of Far Eastern politics, for probable seizure by some power much less sentimental about Filipino independence than we are.

The entire Philippine archipelago is highly mineralized.

It is already ahead of Alaska as the MAJOR OFF-SHORE GOLD PRODUCING AREA UNDER THE AMERICAN FLAG.

Its annual mining production is above twenty million dollars, and it has only BEGUN TO PRODUCE.

It had five producing gold mines in 1933, nineteen in 1936, and will have 29 more before the end of 1937.

THE AMERICAN grant of independence to the Philippines is the SETTING ADRIFT of a HELPLESS COUNTRY.

How long will a helpless country that is also RICH remain independent?

Albany, one of the oldest independent nations in the world, was rich and helpless, and it is NO LONGER FREE. Manchuria was rich and helpless, but did not STAY FREE.

America is not only giving up something it has every moral and practical right to keep, but it is giving the Filipinos something THEY WILL NOT BE ABLE TO KEEP.

Professor Moley's View

PROFESSOR RAYMOND

MOLEY has analyzed the Supreme Court controversy with a degree of wisdom that penetrates the heart of the problem.

The substance of Mr. Moley's objections to the President's program of court reform is that it raises the possibility of procedure in deliberate violation of constitutional law.

He contends, with a logic that is inescapable of dispute, that until the Constitution PERMITS attainment of New Deal objectives, those objectives cannot be LEGALLY ATTAINED.

The Roosevelt plan, stripped of all subterfuge, proposes the creation of a court which would permit the New Deal to enact legislation the Constitution DOES NOT NOW PERMIT.

Mr. Moley has no quarrel with the New Deal objective, and it is in fact far more favorable to most of them.

But he insists they should be accomplished LAWFULLY.

"The American method," Mr. Moley declared to the Senate Judiciary Committee, "is to tell

the public in an orderly fashion precisely what is necessary, and then to ask approval of the change."

Any other method of change, Mr. Moley warned the committee, is ABANDONMENT OF THE AMERICAN METHOD.

President Roosevelt once placed the utmost reliance in the patriotism of Mr. Moley, with tangible proof to himself.

The confidence he then reposed in Mr. Moley was so fully warranted that Mr. Roosevelt can only reject the sound basis of his own experience in disregarding the counsel of a man who served him well.

Mr. Moley has held and STILL HOLDS implicit faith in the ability of Mr. Roosevelt to lead his country through a period of stress.

His counsel, therefore, should give the President pause, to appraise again in the privacy of his own mind the dangers of the course to which his own impatience has driven him.

Mr. Moley has held and STILL HOLDS implicit faith in the ability of Mr. Roosevelt to lead his country through a period of stress.

His counsel, therefore, should give the President pause, to appraise again in the privacy of his own mind the dangers of the course to which his own impatience has driven him.

America's Air Gateway

BOSTON, pace-maker in the rapidly growing aviation industry in the past, always abreast of developments, is not satisfied and intends to do more. That is wise.

The intent, no idle dream, takes substantial form, and there is for the immediate future a program calling for construction of a \$1,000,000 blind-landing runway, two-way radio, a concrete surface and the extension of the airport lease for another 40 years.

Clark Commissioner William P. Long, whose job it is to make the dream reality, tells us:

"We believe that such a development is the key to enduring prosperity for New England."

The Commissioner is right; we can and should become the aerial gateway to America.

Nearest American city to Europe, Boston has a definite advantage over all other cities.

A Warning for Pedestrians

IF motor vehicle fatalities continue at their present rate in this State, the only really safe place for a pedestrian will be up a tree.

Of the fourteen automobile accident deaths last week, EIGHT WERE PEDESTRIANS.

Commenting on the record and noting that it is often healthier in an automobile than out of one, Registrar Goodwin states:

"If we are to cut down pedestrian deaths, pedestrians and drivers alike must realize that when the streets are wet and slippery the driver has not the same control over his car that he has when the streets are dry. This necessarily requires more care and caution on the part of BOTH PEDESTRIANS AND DRIVERS."

This is a fair view. For the man or woman who persists in walking in front of speeding machines is quite as effective an invitation to death as the driver who wanders over his eyes.

Nearest American city to Europe, Boston has a definite advantage over all other cities.

New York Day by Day

By O. O. McIntyre

It was a very busy day in New York today. The city was full of life and activity. The streets were crowded with people and cars. The air was filled with the sound of horns and the hum of engines.

The city was full of life and activity. The streets were crowded with people and cars. The air was filled with the sound of horns and the hum of engines.

For Science to Answer

THE QUESTION OF SAFETY

Back in the sixth century, B. C., Greek philosophers used to talk the world as the center of the universe. From a scientific point of view, this was a very foolish idea. It was not until the sixteenth century that the world was found to be round, and not the center of the universe.

The world is not the center of the universe. It is a small planet in a vast universe. The universe is full of stars and planets, and the earth is just one of them.

The world is not the center of the universe. It is a small planet in a vast universe. The universe is full of stars and planets, and the earth is just one of them.

The world is not the center of the universe. It is a small planet in a vast universe. The universe is full of stars and planets, and the earth is just one of them.

The world is not the center of the universe. It is a small planet in a vast universe. The universe is full of stars and planets, and the earth is just one of them.

The world is not the center of the universe. It is a small planet in a vast universe. The universe is full of stars and planets, and the earth is just one of them.

The world is not the center of the universe. It is a small planet in a vast universe. The universe is full of stars and planets, and the earth is just one of them.

The world is not the center of the universe. It is a small planet in a vast universe. The universe is full of stars and planets, and the earth is just one of them.

The world is not the center of the universe. It is a small planet in a vast universe. The universe is full of stars and planets, and the earth is just one of them.

The world is not the center of the universe. It is a small planet in a vast universe. The universe is full of stars and planets, and the earth is just one of them.

The world is not the center of the universe. It is a small planet in a vast universe. The universe is full of stars and planets, and the earth is just one of them.

Stalin's Retreat

By Isaac Don Levine

Stalin is bringing back the student profit motive which he abolished under the first five-year plan. He has just promulgated a series of laws which will encourage government firms and co-operatives to produce goods for the market.

The laws will encourage government firms and co-operatives to produce goods for the market. They will also encourage private firms to produce goods for the market.

The laws will encourage government firms and co-operatives to produce goods for the market. They will also encourage private firms to produce goods for the market.

The laws will encourage government firms and co-operatives to produce goods for the market. They will also encourage private firms to produce goods for the market.
